Notes

- A. This bibliography does not include records such as card indexes which are normally held only by the Library concerned.
- B. Entries within each Section or Subsection are arranged alphabetically, except where some other order seems more useful, e.g. recent items first.
- C. IBRA = International Bee Research Association. Publications in the IBRA Library are marked B. Some are available only for consultation within the IBRA Library at Hill House; these are marked †. The letter following is the Library shelf-mark.
- D. In Section 2, BOTA = Bibliography of Tropical Apiculture (full reference in Section 1).
- E. Square brackets indicate a translated title or other editorial insertion.
- F. Bibliographies on specific apicultural subjects (including those in selected books and other publications) will be listed separately in IBRA Bibliography No. 36.

1. GENERAL

Journals

APICULTURAL ABSTRACTS (1950 to date)

Btj

°°Journal published by IBRA and edited by E. Crane to 1983, then by D.G. Lowe. It reports the world's apicultural bee literature and has extensive cumulative indexes (Section 10). IBRA also publishes the entries on cards (5 x 3 inches, 127 x 76 mm) as CASCIAA: Complete Author and Subject Card Index to Apicultural Abstracts.

ARCHIV FÜR BIENENKUNDE (1919-1966)

Btj

°°Journal edited and published by L. Armbruster who reported, in abstracts and other ways, on a wide variety of apicultural literature. For example about 900 publications, grouped under subject, are listed in: Verzeichnis der Bienenliteratur des In- u. Auslandes 1890-1918.

[Index to bee literature at home and abroad 1890-1918.] Arch. Bienenk. 1(7/8) : 241-315 (1919) by A. Brosch & L. Armbruster.

BIBLIOGRAPHY OF AGRICULTURE (1942-1968)

°°Journal published by United States Department of Agriculture; issues included a separate section with entries on apiculture, all of which are in the USDA Bibliography (see 3 items down).

See also Section 10: Cumulative indexes of apicultural journals.

Bibliographies with fairly wide reference (most recent first)

CRANE, E. (1978) Bibliography of tropical apiculture (BOTA). London :

IBRA 380 pages

Bd

°°4045 entries, most annotated, in 24 Parts, geographical (see Section 2) and by subject (see IBRA Bibliography No. 36).

CRANE, E. (1978) Bibliography of tropical apiculture (BOTA). Satellite bibliographies. London : IBRA 238 pages

Bd

°°2400 entries relating to specific countries (see Section 2) and specialized subjects (see IBRA Bibliography No. 36).

USDA Bee Bibliography (to 1972)

°°This Bibliography on cards was started by Professor E.F. Phillips in the early part of the century and was closed in 1972. An article by MERRILL, J.S. (1959) Quart. Bull. int. Ass. agric. Libr. 4(2) : 79-80, "Index to the world's beekeeping literature" gives information. The Bibliography has 82 875 entries, 35 662 by author and 47 213 by subject. In 1976 USDA presented to IBRA a microfilm copy of the Bibliography, 30 rolls.

3. GERMAN-LANGUAGE APICULTURAL BIBLIOGRAPHIES (most recent first)

DROEGE, G. (1962) Bibliographie der deutschen bienenwissenschaftlichen Literatur (*Apis mellifica* L.), [Bibliography of scientific German literature on the honeybee.] Berlin : Institut für Geflügel- und Pelztierzucht der Humboldt-Universität. 5 vols. 805 pages Bd
 °°This Bibliography covers publications in German on bees and bee-keeping, up to the end of 1961, and it gives Library holdings of both books and journals. About 10 000 items are arranged under subject, according to a specially invented classification, to which there is an alphabetical index in German. Publications on each broad subject occupy several pages, in alphabetical order of author. The author index in Vol. 5 gives symbols for all the subjects under which entries for that author appear; the index to these symbols in Vol. 1 then gives the initial page number for each subject. This page is sought in the appropriate volume, where the required alphabetical sequence commences. To find a specific publication of an author thus takes some time. It is easier to find publications on a given subject, and this is the primary purpose of the bibliography. It is fairly complete but not entirely so. A supplement (Nachtrag) appeared in the years listed below, by the same author and publisher: 1963 59 pages, 1964 45 pages, 1965 51 pages, 1966 65 pages, 1967 40 pages, 1968 34 pages.

BEE RESEARCH ASSOCIATION (1956-1976)

INTERNATIONAL BEE RESEARCH ASSOCIATION (1976 to date)

(1) After 1963 (entry above), books added to the Library were listed regularly in Bee World.

(2) From its foundation in 1950, Apicultural Abstracts has included the code letter B for all publications reported that are in the BRA/IBRA Library. Apicultural Abstracts with its cumulative indexes (Section 10), and the next entry here, thus serve as a considerable catalogue.

(3) IBRA holdings of books and reprints published before 1950, and any others not reported in Apicultural Abstracts, are recorded on Guelph Computer Tape 2; occasional printouts of Subject and Author Catalogues have been made, and microfiches to 1984 can be purchased; they provide cumulative indexes to this literature, by subject and by author (see also first entry in Section 10).

(4) All bee books in the Library in 1978 were marked B in "British bee books: a bibliography" (second entry under United Kingdom in Section 2).

LIBRARY OF CONGRESS, Washington, DC, has many apicultural publications, but no separate catalogue is known.

°°All bee books in the Library in 1978 were marked W in "British bee books: a bibliography" (second entry under United Kingdom in Section 2).

MANN LIBRARY, Cornell University, Ithaca, NY, has a very large apicultural collection, but no published catalogue is known.

°°All bee books in the Library in 1978 were marked C in "British bee books: a bibliography" (second entry under United Kingdom in Section 2).

MERRILL, J.S. (1976) Apicultural issue. Associates NAL Today 1(1/2) : 1-48 Bd

°°Most of this publication is concerned with, and serves as a memorial to, the Bee Culture Branch (at Beltsville, MD) of the National Agricultural Library (NAL). It was formed nearly 50 years ago, and became one of the largest apicultural collections in USA, but it was phased out in 1972-1976 as part of a reorganization of USDA, and incorporated in the NAL, also at Beltsville. Historical information is supplemented by a bibliography of pre-1870 monographic imprints that were in the collection (pp.26-48).

UNIVERSITY OF WISCONSIN (1936) The Charles C. Miller Memorial Apicultural Library catalogue. Madison, Wisconsin : University of Wisconsin. 283 pages Btd

°°A typed list in author order, items from the Walker Library (purchased in 1930) being marked *. Estimated numbers are 3500-4000 books, pamphlets, etc., and holdings of 500 journals.

All bee books in this catalogue were marked M in "British bee books: a bibliography" (second entry under United Kingdom in Section 2).

10. CUMULATIVE INDEXES OF APICULTURAL JOURNALS

Apicultural Abstracts

CRANE, E.; TOWNSEND, G.F. (1976) Index to Apicultural Abstracts 1950-1972. Folkestone, UK : Dawson for Bee Research Association. xxii + 1824 pages, in 2 vols.

Btd

°°This index provides a comprehensive computer-generated key to literature on bees and apiculture during 23 years of important world-wide development. Volume 1 includes instructions for use (in French, German and Spanish as well as English), and a single Author Index to all authors and co-authors in alphabetical order. Volume 2 is the Subject Index, arranged in numerical order according to Universal Decimal Classification numbers. The full key leading to these numbers is an alphabetical index to subjects (descriptors/key words); it is in Volume 1, so that the key and the Subject Index can conveniently be used together.

The two volumes comprise some 43 000 subject entries and 20 000 author entries, to a total of 14 424 publications (9986 abstracted and 4438

listed) which, with few exceptions, appeared between 1949 and 1972. There are about 5600 main subject divisions, and the works of 7000 authors are represented.

In both Author and Subject Index the title of each publication is given in English, the most recent publications coming first. The original language is stated; any English summary is noted, and also the availability of the original publication (and any translation of it) from the International Bee Research Association Library. A unique code number gives the location in the journal Apicultural Abstracts, which contains the full reference to the original publication.

Subjects covered include beekeeping, especially technical developments in bee management and new equipment; honeybees and other Apoidea; hive products; and nectar, honeydew and pollen and their plant sources. The material scanned represents a wide range of sources including patents, theses and annual reports as well as books and periodicals, in over fifty languages.

The book was possibly the first computer-generated index to abstracts on any subject, covering such an extensive period. The University of Guelph carried out the computer operation.

INTERNATIONAL BEE RESEARCH INFORMATION (1979, 1980, 1982, 1984) Microfiche index to Apicultural Abstracts 1973-1979 (and subsequent updated editions, latest to end 1983). Produced as COM (computer output microform) by the University of Guelph, Canada. See Bee Wld 61(2) : 42-43 (1980).

°°Intermediate editions were to end of 1979 and 1980 and mid 1982. A revised computer program on COM microfiches carries on from the 1950-1972 Index.
